If some or all of your mailboxes are in Office 365, there are a few options available: SMTP relay, client SMTP submission, or Direct Send.. Network your employees, partners, customers, and other parties to share resources in site-to-cloud, cloud-to-cloud, and virtual private cloud (VPC) connectivity.. As part of the service, Office 365 includes an SMTP server that lets you send emails without using Outlook.. When I configure it through outlook using IMAP protocol it says: Send test e-mail message: None of the authentication methods supported. [Luckiest Guy Font Download Mac](#)

outlook.com For more information on configuring your Office 365 Connectors to your IP addresses, visit our support page: Setup Office 365 for SMTP Relay Assuming your Office 365 account is configured, you can connect to the smtp. With Office 365, Microsoft hosts Outlook and your emails in the cloud eliminating the complexity of hosting and managing your own Exchange server. If you have any other email provider, simply go ahead and google "NameOfYourEmailProvider smtp settings" and you will very likely find it with the first result. Dec 24, 2015 SMTP (Simple Mail Transfer Protocol) is used when you set up an on-premises multi-function printer, scanner, fax, or line of business (LOB) application that needs to send email.
